Subject: RE: PCB Contaminated Soil Disposed in Pa Fill Site

We were able to run this down - there is a lot of discussion here regarding this matter. The principle are Kelly Bunker (TSCA), Aquanetta Dickens (TSCA), Harry Daw (TSCA), Paul Gotthold (RCRA), Judy Hykel (RCRA), and AJ D'Angelo (TSCA/RCRA attorney). They plan to talk to you guys in the State (I'm not exactly sure who), but Paul, Harry, and Aquanetta are all out of the office this week. I've let Judy know that you guys have questions (she's copied on this message), and she will reach out to you. Thanks - Carol

Subject: RE: letter

I found the submittal. It is for 100CY of historic fill from Chelsea Road Realty, LLC located on 333 Chelsea Rd in the city of Staten Island, NY.

It states:

A review of site background, cleanup history, information surveys and analytical data was completed. The results provided the conclusion that the material would be managed as historic fill ... and that Metals, VOC's, SVOC's and PCB's analysis would be performed to properly characterize the soil. ... All material proposed for beneficial use is represented by the initial samples. There are no areas to be segregated prior to shipment to HCP.

The site due diligence form from the Chelsea Rd. site, RP states "based on past use, samples *?a word I can't read?* throughout the site were ND except for a localized spot w/PCB's."

The 3/21/16 letter indicates that there were soil borings on the site, one of them AES-4, had a PCB result of 112.5ppm. They did 4 more borings around AES-4 to delineate the extent of the PCB contamination. The AES to HCP letter states that the PCB contamination was limited to a 5'x5'x6' area. Which is 150 CF – 5.5 CY. Using HCP's conversion of 1.5 tons per yard = 8.25 tons.

The 2 samples provided in the submittal had PCB results of 4.61 and 3.86. Based on the chain of custody included, these were from a soil stockpile and not any of the boring samples (even though one also had result of 4.61.)

Deliberative Process / Ex. 5

HCP records show that they accepted 8.24 tons of soil from Chelsea Rd.

Importance: High

The source of the soil was Chelsea Road in Staten Island, NY. I have been unable to locate the submittal, but the information in the database shows that the regulated fill submittal was for 100 CY of historic fill and received on 7/24/14, approved on 8/1/14. The shipment was received by HCP on 7/29/14. They did not wait 10 days or for approval as required by their permit to accept the soil.
